

Registering a death: Handover for registration

Session aims

In this session we'll focus in on how the death certification process can best support registrars and representatives in registering a death.

We'll run through, at a high-level what our current understanding is around:

- Telling the representative that they can now register a death.
- A registrar receiving and processing an MCCD.
- Some other potential 'unhappy or alternative paths' e.g. Registering at another local registrar office.

We'll raise and answer questions, highlighting what we know and where further work is needed. Please do feel free to add any research insights or statistics.

Lastly, we'll have a bit of a discussion around any additional sessions needed.
